Light, the beginning of a moment.

Light was the beginning of time and the Starting point of the moment when the Universe came about and the history of Mankind came into the visible existence. Sky, Ocean, Cloud, Tree, and Blossom.....Light makes all these things visible.

Light, Creates life.

Mankind began their living when they started to use fire. Mankind was able to overcome darkness by light of fire, started making food, and lived in warm shelters. Finally, Thomas Edison invented the light bulb and with his Invention, mankind started a new era.

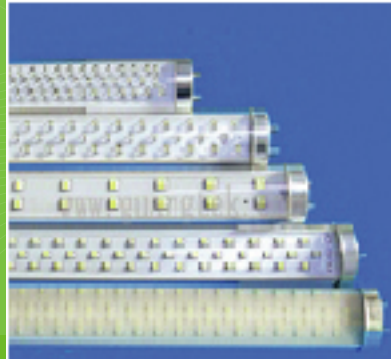

AGLOW LED SOLUTIONS...

Glow in the Night

Radiance the Spectrum

AGLOW MIDDLE EAST

Aglow Middle East is subsidiary company of Aglow International LTD a London based lighting company. Since our establishment, we lead the UK lighting industry with superior technical expertise and constant research. We are building solid relationships with our customers and increasing value as a company. Our target is to grow eventually to become a public listed company.

we created a fully integrated solution for the Lighting market. Through our strategic alliances and distribution relationships, we are able to meet our customers requirement and demands. We plan on actively certifying all our products and products to come to legitimize the performance and efficiency of our products, and to further secure the trust from our customers.

As we move forward in this constantly changing and advancing industry of LED lighting, we plan on delivering the highest quality of products to our faithful and loyal customers and providing them with the best lighting solution. Please keep on eyes on us as we actualize our "total solution" concept in our LED manufacturing business.

Industry Updates on LED products.

LEDs are about 90% more energy-efficient than the standard incandescent bulb, and about twice as efficient as Compact Fluorescent Lightbulbs. Thanks to efficiency, LEDs cost more upfront than their tungsten rivals but win back huge savings in the long run. (Report: BBC, 2008).

All incandescent bulbs will be phased-out by 2013 in UK. The United States is also pulling-the-plug on incandescent lightbulbs, with an end date of 2014. (Report: BBC, 2010).

AGLOW PROVIDES A WIDE RANGE OF LED PRODUCTS

AGLOW'S wide range of led products help our clients to value their space and getting them perfectly designed...
